

BestMove STA400 & STA450

Standing Transfer Aids

The BestMove STA400 and STA450 are great choices for fall prevention during standing transfers. These non-powered lifts are an excellent option for short distance transfers with patients who are unable to walk, but able to stand. They are a vital part of reducing lifting injuries while at the same time promoting mobility for the patient. Both devices offer an ample weight capacity of 400 lb or 450 lb max. The STA450 includes an adjustable base to provide clearance around common obstacles such as recliners, toilets and wheelchairs, allowing easier access to patients.
