

Lotus Stand Aid

An Active Non-Powered Transport Aid

The Lotus is a standing transfer aid designed for individuals that are able to stand but have challenges walking. Designed to prevent lifting injuries and falls while promoting mobility, the Lotus makes it easy to transfer from bed to toilet and back again. The frame design accommodates a variety of body shapes, with a weight capacity of 440 lb (200 kg) for the Lotus and 500 lb (227 kg) for the Lotus XL.

Expertly designed swiveling seat components, comfortable lower leg support, and multiple grip options allow patients to stand and actively sit to begin a transfer. The active seated position means that less effort is required to return to a standing position.

An intuitive mechanical leg-spread adjustment provides clearance around common obstacles such as recliners, toilets, and wheelchairs as needed. Lockable swiveling casters allow the Lotus to easily turn in place while providing a safe and stable support for transfers.

Model	Weight Capacity	Part Number
Lotus	440 lb (220 kg)	59008200
Lotus XL	500 lb (227 kg)	59008270
